American Nurses Association Code for Nurses

- I will, in all professional relationships, practice with compassion and respect for the inherent dignity, worth and uniqueness of every individual, unrestricted by considerations of social or economic status, personal attributes or the nature of health problems.
- My primary commitment is to the patient, whether an individual, family, group or community.
- I will promote, advocate for and strive to protect the health, safety and rights of the patient.
- I owe the same duties to self as to others, including the responsibility to preserve integrity and safety, to maintain competence and to continue personal and professional growth.
- I will collaborate with other health professionals and the public in promoting community, national and international efforts to meet health needs.
